

eMAX™ SCAVENGING POPPET VALVE

For reliability, efficiency, and proven long life, CECO eMAX™ scavenging poppet valves are unmatched. The seat and mating parts are fully machined on CNC tools which provide position accuracy to .0005, granting added quality machined and durability. All sealing surfaces are grounded flat to prevent leakage between mating parts. Our fasteners are captured by design so that all components are fully retained.

eMAX™

IMPROVE AIR FLOW

- Greater Flow Area:
 - Delivers more scavenging air, lower NOx emissions
- High Efficiency:
 - Lower cost, simple field repair, durability, long operating life and better air flow
- Bolts Captured by Mating Parts
 - Prevents threat of loose parts in cylinder
- Sealing Surfaces Ground Flat
 - Prevents leakage

Adds up to 30%
more air PSIG!
