

# ePV™ PORTABLE MONITORING KIT

## INCLUDES:

- ePV™ portable with display & 30' cable
- ePV™ flow sensor with 6 configurations available
- Flash drive with ePV™ calibration & monitoring software
- User guide, conversion tables & NIST traceable calibration
- DC charger
- USB cable
- Pelican case
- Certificate

CECO's ePV™ Portable Monitoring Kit is a self-contained emissions monitoring system that provides a direct measurement of flow in vent lines, helping you to comply with EPA Greenhouse Gases Reporting Rule Subpart 'W' and local requirements for emissions monitoring

# ePV™

- Accommodates pipe diameters between 1/4 inch to 6 inches

- Utilizes proven thermal-dispersion flow measure technology with equal mass sending to achieve outstanding sensitivity and repeatability

- Available with compression tube tee or adjustable length probe with 1/2" npt fitting

- The 316L stainless and Hastelloy-C sensor element in the CECO ePV™ sensor provides superior corrosion resistance

- Sample integrity is preserved by absence of contamination-prone cavities, orifices and dead-legs, leading to faster system sampling times
