

truBALANCE™ FUEL GAS MODULATOR

PROVIDES PRECISE AIR/FUEL MIXTURES!

FINE-TUNE AIR & FUEL FOR CLARK
COOPER, AND WORTHINGTON ENGINES

CECO truBalance™ Fuel Gas Modulators help balance individual power cylinders and give precise control over pressure and temperature. They allow for precise air/fuel mixture, extending the life of cylinders, valves, seats, rings, bearings, and pistons.

Quick Installation
&
Exact Control!

truBalance™

- Precise control allows incremental changes of gas flow by hand
- Helps balance individual power cylinders
- Ease of maintenance and installation
- Accurately control gas flow to each power cylinder
- One-piece design available in multiple sizes
- Allows for ease of engine balancing reducing fuel consumption and pollutants
- Completely replaces old valve body
